Letter of recommendation for Miss Aurelie Delabroise:

Dear Sir / Madam,

Aurelie worked in our export department for seven months during 2009 with the objective of introducing / promoting our range of products to the French market.

Due to the nature of our products this placement involved market research within numerous industries (mobile home, caravan, bicycle, motorcycle, garden, swimming pool etc) but the main emphasis was placed on the mobile home industry (which is our core business in the UK).

In addition to market research Aurelie also managed other marketing activities including advertising, organising and attending meetings in France with potential customers and also supervising promotional mailings followed up with extensive telephone support.

Other non-marketing duties included the organisation of transportation for our products to our French warehouse and various product samples delivered throughout France, communication with our French agent and distributor on a regular basis, working with our accounts department with issues such as French VAT implementation and day to day activities such as taking orders and answering customer questions.

Having worked closely with Aurelie during her time at our company I would have no hesitation in recommending her to any other company as she is extremely hard working, conscientious, and professional.

The most impressive aspect of Aurelie is her ability to work to a very high level without supervision – once she receives a task you can be sure that it will be completed to the highest standard and in good time.

In addition Aurelie was always a pleasure to work with and she was very well liked by all her colleagues.

Yours faithfully

Andrew Smith
Marketing Director
Trimetals Ltd
