October 17th,

Dear Mrs, dear Mr

Student in a third year of social sciences license, event course, at ESTHUA (High school of tourism and hotel at the University of Angers), I have developed a pronounced taste for tourism and event fields. During the second semester of the year (from March 2017 to June 2017), I will have to do an internship that matches with my training in order to get a professional experience in the field that interests me.

So, I am looking for an internship by which I will participate to conception and promotion of your company's events. I wish to get involved in the success of launch parties organisation, private or public events planning, many things interest me. Really motivated, I would like to learn your job and to help you to create unique events thanks to your knowledges which you will forward to me.

Dynamic, organized, smiling, good relationship, there are skills I developed during my life and more precisely, thanks to my courses and my professional experiences. I know how to make listen my ideas to others and to argue. I think that it's an asset in the event field to convince sponsors and to get contracts.

I hope that these elements, and those which are on the CV enclosed, will hold your interest. I remain at your disposal to give you more details during an interview. You may contact me by phone or by mail.

Yours faithfully,

GOUBEAULT CLEMENCE
